

## Table of contents

The Gauss-Airy functions and their properties <i>Alireza Ansari</i>	119
Estimations of the difference between two weighted integral means and application of the Steffensen's inequality <i>Sanja Kovač, Josip Pečarić, and Anamarija Perušić</i>	128
On some I-convergent sequence spaces defined by a compact operator <i>Vakeel A. Khan, Mohd Shafiq, Rami Kamel Ahmad Rababah, and Ayhan Esi</i>	141
Competition phenomena and weak homoclinic solutions to anisotropic difference equations with variable exponent <i>Aboudramane Guiro, Blaise Koné, and Stanislas Ouaro</i>	151
Renormalized solution for nonlinear elliptic problems with lower order terms and $L^1$ data in Musielak-Orlicz spaces <i>Mustafa Ait Khellou and Abdelmoujib Benkirane</i>	164
Maximum flows in parametric dynamic networks with lower bounds <i>Nicoleta Avesalon (Grigoras)</i>	188
The maximum flows in bipartite dynamic networks. The static approach <i>Camelia Schiopu</i>	200
Localization of semi-Heyting algebras <i>Aldo V. Figallo and Gustavo Pelaitay</i>	210
Properties of stratified languages <i>Irina Tudor</i>	218
Integral ideals and maximal ideals in BL-algebras <i>A. Paad</i>	231
Filter theory on good hyper $EQ$ -algebras <i>B. Ganji Saffar and R. A. Borzooei</i>	243

On a nonlocal problem involving the generalized anisotropic $\vec{p}$ ( $\cdot$ )-Laplace operator <i>Mustafa Avci</i>	259
On the controllability of a system of two Schrödinger equations <i>Laurențiu Emanuel Temereancă</i>	273
Adapting the semantic cache for CMIS eXtent <i>Mihai Stancu and Florin Slabu</i>	280
