Table of contents

A new generalization of semiregular rings 167
Tayyebeh Amouzegar

A topological duality for $\boldsymbol{M_3}-$lattices 174
Aldo V. Figallo and María A. Jiménez

Generalized co-annihilators in residuated lattices 190
Saeed Rasouli

Infinite order of transcendental meromorphic solutions of some nonhomogeneous linear differential equations 208
Nour el imane Khadidja Cheriet and Karima Hamani

Lacunary ideal quasi Cauchy sequences 220
Bipan Hazarika and Ayhan Esi

On a Hardy's inequality for a fractional integral operator 232
Jorge Eliecer Hernández Hernández and Miguel José Vivas Cortez

Converses of the Edmundson-Lah-Ribarič inequality for generalized Csiszár divergence with applications to Zipf-Mandelbrot law 243
Rozarija Mikić, Đilda Pečarić, and Josip Pečarić

A quenching result of weak solutions of semi-linear parabolic equations 258
Dao Nguyen Anh, Nguyen Van Bay, and Dang Phuoc Tan

FPGA design and hardware implementation of a convolutional neural network for classification of saccadic eye movements 263
Carlos Cano, Ruxandra Stoean, and Gonzalo Joya

From rotations of conics to a class of Riemann-Finslerian flows 275
Mircea Crasmareanu

On solutions of functional equations with linear translations 283
Mitrofan M. Choban and Larisa M. Sali

Standing wave solutions of a perturbed Schrödinger equation in an Orlicz-Sobolev space setting 290
Vasile-Florin Uţă

Periodic solutions for some second-order impulsive Hamiltonian systems 304
Fatemeh Vahedi, Ghasem A. Afrouzi, and M. Alimohammady

Integrability conditions for a cubic differential system with two invariant straight lines and one invariant cubic 313
Anatoli Dascalescu

The refinements of Hilbert-type inequalities in discrete case 324
Predrag Vuković

Continuous spectrum for a degenerate eigenvalue problem with (p_2, p_2)-growth 330
Iulia Dorotheea Stîrcu
